New record at #LMAB15

433 hot air balloons over **3 lines**, more than **6km of balloons aligned** on Chambley Planet'Air airfield (Meurthe-et-Moselle / Lorraine / France). The biggest gathering of hot air balloons in the world, [Lorraine Mondial Air Ballons® #LMAB15](#), broke its own record, which was held since August 2013 (391), on Sunday morning at 8:30 pm. An incredible adventure for this 14th edition of an event created in 1989.

Certified by **Maître Christophe Dzelebdzic**, court bailiff in Briey, the mass ascent of hundreds of hot air balloons took place in calm wind and brilliant sunshine in front of thousands of spectators flocked despite the early hour (6:30 am). The event also holds the world record (validated by the **Guinness World Records**) with **408 balloons** which had arisen in less than an hour July 31st, 2013.

The event runs until **August 2nd, 2015** at the aerodrome, which becomes during ten days an **International Balloons Airport**, which also includes all aircraft (planes, microlights, helicopters, gliders, aero models, flexible sails). Numerous events, workshops, conferences are held there every day. With its main partner the **Regional Council of Lorraine**, the entrance and parking are offered to the public.
